

## Developer Python

### About this job

Location : Coimbatore

Job type: Full-time

Experience level: Junior to mid level

Industry: Software Development

Company size: Seed funded startup (handful of employees)

Experience : 2 to 7 Years

**What do we do?** We are an early seed funded startup in the eCommerce reseller space. It's an exciting and hot area where we provide a sustainable technology enabled solution for small/medium businesses to improve their profits by growing sales, protecting margins and automating workflow.

**What kind of people will I work with?** The Founding team consists of veterans who have worked and led teams across the Silicon Valley, India and EU/UK and have led development of world class products. We are sure it will be a very fulfilling experience to work with this team.

At this time, 50% of our development work is complete & we've successfully acquired 100+ customers. We are a growing organization & take pride in an open culture and work life balance.

**Is this the right job for me?** If you like ground floor startups, are confident about yourself and like to solve problems and research things. If you are a quick learner under some supervision. If you like to be an important member of a team that contributes to the larger goals of the company.

### Must Have

Strong Experience with Python & or Node JS

Strong experience with AWS and its services(Lambda, RDS, Cognito etc)

Experience with API based Architectures(eg REST, JSON API, MS etc)

Experience doing Unit Testing

Knowledge and experience with SQL and some data modelling
